EDUCATION

University of Massachusetts Amherst

Sep 2022 – May 2024

MS Computer Science

GPA: 4.0/4.0

Coursework: Adv. Computer Networks, Distributed and Operating Systems, Machine Learning

University of Mumbai

Jul 2015 – May 2019

BE Information Technology

Coursework: Data Structures and Algorithms, DB Management Systems, Cloud Computing, Big Data Analytics

EXPERIENCE

Spirent Communications — Software Engineer Intern

Remote | June 2023 – Present

- Redesigning legacy Windows applications as single page apps in React and Python to modernise user experience for customers which is expected to **improve time to market by 10x**.
- Engineering a network architecture for hosting web applications on remote client machines using Nginx.

UMass Amherst Center for Data Science — Data Science Intern

Amherst, MA | May 2023 – Aug 2023

- Analyzed 22M Slurm jobs at Unity, a High Performance Computing cluster and designed intuitive dashboards in Tableau increasing **user productivity by 100%**.
- Automated resource usage reporting of the cluster to aid administrators in capacity planning using Python and SQL.

One2n — Site Reliability Engineer

Pune, India | Sep 2021 – Jul 2022

- **Improved developer productivity 200x** by introducing CI/CD using Jenkins and Terraform to automate the build, test and deployment process.
- **Reduced the MTTR to 50%** by integrating Grafana and Prometheus to improve observability into infrastructure.
- Mentored 3 junior developers on SRE best practices, and designed new tutorials for onboarding.

WorkIndia — Infrastructure Engineer

Bengaluru, India | Jun 2020 – Sep 2021

- **Reduced AWS costs by 67%** through cost-saving strategies like optimal resource allocation and auto-scaling cluster.
- Migrated infrastructure from AWS EC2 to Kubernetes, resulting in **5x faster time to market for new features**.
- Envisioned and led a new team to improve the scalability and security of the cloud infrastructure.
- Engineered an isolated staging environment in Kubernetes that increased developer productivity.

WorkIndia — Full Stack Developer

Bengaluru, India | Jun 2019 – Jun 2020

- **Increased revenue by 10%** by implementing automatic payment renewals using Django and PostgreSQL.
- Redesigned a user-friendly job portal in React, **increasing user interactions by 45%**.

Barclays — Intern Analyst (Barclaycard)

Pune, India | Jun 2018 – Jul 2018

- Developed intuitive interfaces using C# and .NET for managing customer interactions which **improved support team productivity by 6%**.

PROJECTS

User Interaction Events Data Pipeline | Kafka, Spark, Cassandra, Presto

Nov 2022

- Implemented streaming Big Data ETL pipeline to process user interaction events on Netflix.
- Used Apache Kafka, Spark, Cassandra, Presto
- Investigated performance of the system by varying number of cores and volume of input data.

HealthSet - Personal Health Monitoring Device | Java, Android, Firebase

Jan 2018 – Aug 2018

- **Second runner-up** at Texas Instruments IICDC 2017.
- Developed an Android app that displayed real-time ECG of a patient from an IoT device.
- Integrated remote sync of patient data using Firebase.

TECHNICAL SKILLS

Languages/Frameworks: Python, Java, C, HTML, CSS, JavaScript, SQL, Go, C#, PHP, Django, React, Node.js

DBs: MySQL, PostgreSQL, MongoDB

Technologies: Linux, AWS, Kubernetes, Tableau, Jenkins, Terraform, Ansible, Grafana, Prometheus

PUBLICATION

Real-Time Location Tracking System for Predetermined Routes | Android, Kafka, AWS

Grenze International Journal of Engineering and Technology, Vol. 7, Issue 2, July 2021
